## What is CHFI?

The Computer Hacking Forensics Investigator (CHFI) certification exam is provided by the EC-Council.

Computer Hacking Forensic Investigation (CHFI) is the process of detecting hacking attacks and properly extracting proof to report the crime and conduct an investigation to prevent future attacks.

Computer forensics is simply the application of computer investigation and analysis techniques to determine potential legal evidence. Evidence might be sought in a wide range of computer misuse or crime, including but not limited to theft of trade secrets, theft of or destruction of intellectual property, and fraud. Computer forensic investigators can draw on an array of methods for discovering data that resides in a computer system, or encrypted, recovering deleted, or damaged file information.

## Who can learn CHFI?

The CHFI program is designed for all IT professionals involved with information system security, incident response, and computer forensics.

## CHFI Exam

CHFI certification is valid for three years from the date of certification. During the three year period, the certification must be renewed by participating in EC-Council Continuing Education (ECE) Program.
